

Project Engineer (Civil/Geotechnical) - Sydney

We have a newly created position in our Sydney head office for an Engineer with roughly 5 years contracting & construction experience in the mining & civil industries. You will need to be a degree qualified Civil / Geotechnical Engineer, preferably with specific experience in Ground Support & Foundation Engineering projects involving various drilling, piling, injection grouting & ground anchoring techniques. The projects and role will often be varied and will cover projects running from a few weeks to 6 months plus.

This role will be most suitable to someone who enjoys the complete challenge of getting projects across the line from tendering, negotiating, delivering and managing the projects through to practical completion. You will report to the Operations Manager and will need to work closely with an experienced team to deliver projects nationwide and from time to time internationally.

A proven track record in the following is essential:

- ✓ Excellent forward Planning skills
- ✓ Knowledge of drilling & grouting techniques in ground support & piling
- ✓ Understanding of the principals for rockfall protection & slope stabilisation systems
- ✓ Working on large infrastructure & mining projects as a contractor / sub-contractor
- ✓ Client liaison from early projects stages to completion
- ✓ Estimating & budget preparation for new projects
- ✓ Procuring & managing subcontractors
- ✓ Organising and leadership of teams with Construction Supervisor
- ✓ Accurate project & site planning
- ✓ Assessing, procuring and managing of subbies & suppliers
- ✓ Contract appreciation, Commercial awareness and running accurate cost to competes.
- ✓ Personnel management & development building
- ✓ Accuracy in environmental and health and safety management.
- ✓ Accuracy in all quality assurance of the works & detailed documentation
- ✓ High level of confidence to on-site problem solving

This opportunity is also likely to have involvement with some of the Rockfall & Slope Stabilisation projects that the company delivers through-out Australasia & SE Asia. Specific training and coaching in these fields will be provided by the in-house technical management at Geovert.

If you would like to know more, please call us on 02 9700 7975, or send your CV to careers@geovert.com
