

## Fitter/Mechanic Required

Geovert Pty Ltd is a specialised civil, geotechnical and rope access construction company that provides ground support in both civil and mining areas with regional offices in Australia & NZ.

We require an experienced Fitter/Mechanic for a long term (9-12Months) fly in and fly out project at Freeport Mine in Indonesia.

There is a possibility for continued work beyond this time.

Experience with geotechnical drill rigs, grout plant & air compressors is highly desirable.

An IRATA rope access qualification or an aptitude for working at heights is also advantageous.

The project is resourced from NZ and will be paid and taxed in NZ.

### To be successful in this role in this role

- Have a good working knowledge of mechanics, hydraulics & welding (MIG)
- Preferably be familiar with geotechnical drill rigs, grout plant & air compressors
- Able to work and contribute to a productive and positive team environment
- Able to work to deadlines and manage time
- Support a culture of health and safety
- Team player

### Rewards

- Competitive rates based on skills and experience
- Your professional development and career opportunities within the business will be well supported and encouraged.
- Long term opportunities

Immediate start, offering great rates of pay.
